

U72 - ARBORETUM LANGEADOIS ; Auvergne 15/07 - 31/07/2009

For the first year ever, the group of municipalities of the Langeadois and études ET chantiers have come together to organise a workcamp.

Young people of your age (students) who live in Langeac or near by are looking forward to meeting you.

You will live, work, and discover the area together, all throughout the workcamp. Young locals will take you around and you will let them know about your own country.

The local group is constituted and builds a blog to contact you before the camp and present the little town, the landscape ...

Your ideas are welcomed and you will have the opportunity to discuss and exchange on your blog !!

You will take part to highlighting arboretums situated along a footpath. Lots of vegetation clearing on the program!

You will use cisors... and a leader will be with you to supervise and help you.

You will stay in Langeac : a city with 4000 inhabitants, situated at the heart of the Haute Loire department and the Gorges of the Allier River.

A number of activities are possible; hiking, visits, escalade, canoe, as well as the museum and visits to farms. You can also find a swimming pool in Langeac, as well as many shops...
